Sara Lærke Meltofte Trærup

Sara Trærup is a development professional with robust experience in project and team management, as well as research and advisory based work in the fields of climate change, technologies and sustainable development. Since joining UNEP DTU in 2005, Sara Trærup has supported developing countries in identifying their technology needs, and helped build capacity for accessing finance for implementing these technologies. She is both the global project manager for the TNA project and regional coordinator for Africa. Sara has a background in agricultural economics, and a PhD in socioeconomic aspects of climate change adaptation

Vladimir Hecl

Vladimir is Programme Officer at the UNFCCC, Bonn, Germany. He received Ph.D. from Technical University in Zvolen, Slovakia in 2012 from assessment of NOx production from short rotation biomass combusting. After over 10 years working at Energy Centre Bratislava, he served as project officer in Intelligent Europe Energy Agency of the DG TREN of the European Commission. In 2006 Vladimir joined the technology implementation team of the UNFCCC, working in technology negotiations, and in technology needs assessments of non-Annex I Parties to the UNFCCC, including both mitigation and adaptation technologies.

Federico Antonio Canu

Federico has been working at UNEP DTU Partnership since 2011 after being stationed at the Belize Ministry of the Environment and Natural Resources. In Belize he worked with capacity building and the identification of potential projects for the CDM. He has extensive experience in providing capacity building for NAMA development in developing countries, and application of stakeholder consultation methodologies for identification and prioritization of mitigation actions. Amongst his latest engagements, he has provided support to São Tomé and Príncipe in designing their Nationally Determined Contribution (NDC), and is assisting Mozambique in developing capacities to adhere to the transparency requirements of the Paris Agreement. Federico has a M.Sc. in Technological and Socio-Economic Planning from Roskilde University.

Peter Storey

Peter Storey is a financing professional, specialized in developing countries and transition economies with significant expertise in renewable energy as well as other infrastructure sectors. He has held senior positions with major European banks and project developers and has over 20 years of experience of working on multi-disciplinary advisory and financing mandates and of structuring and developing projects.

Peter is a Global Coordinator of the Private Financing Advisory Network (PFAN). PFAN is a multi-lateral public private partnership which connects Clean Energy projects with investment in developing countries.

Sammy Malaki

Sammy Malaki is the Head of Finance at SunFunder Inc, A specialist debt financing provider for the off-grid solar industry with lending products ranging from inventory finance and working capital to structured receivables financing solutions for pay-as-you-go distribution models, alongside financing options for commercial & industrial solar projects. At SunFunder, Sammy is responsible for all aspects of corporate finance and internal controls. Additionally, he supports the KOSAP program and mentoring junior staff.
